Large Servo Drive Electric Injection Molding Machines

650-ton J650AD-3100H and 850-ton J850AD-5200H

With JSW AD Series machines, you receive:

- 20% increase in platen speed, reducing dry cycle time
- Fast ejector speed shortens part removal time
- Extremely rigid clamping unit for high-precision, stabilized molding
- Mold open/close regenerates 8% of power supply, reducing energy consumption by 60%
- Patented, user-friendly controls
- Greater productivity, quality, and part to part consistency
- All backed by JSW's unparalleled technical service and support

MODEL	J650AD-3100H	J850ADW-5200H
Safety Standard	USA	USA
MIOSHA	installed	installed
Power Supply	AC480V 60Hz 3P3W	AC480V 60Hz 3P3W
Platen	SPI	SPI
Screw Size	A-92mm	A-110mm
Screw	Double Flight M3 Chrome-plated	Double Flight M3 Chrome-plated
Screw Tip	standard	standard
Barrel	Bi-metallic N2000F	Bi-metallic N2000F
SVO Nozzle (Tip Type)	R 3/4" x Dia.1/4" x Stroke 2.0"	R 3/4" x Dia.1/4" x Stroke 2.0"
Installation	by Leveling Pads	by Leveling Pads
SPI Robot Interface	ANSI-146, Euromap-67	ANSI-146, Euromap-67
Hopper (SUS)	170L	340L
Daylight Extension	200mm	200mm
Die Height *Min.Die Height maintained	450mm - 1200mm	500mm - 1300mm
Hydraulic Core *without Power Pack	2-lines each (total 4-lines)	2-lines each (total 4-lines)
Air Jet	-----	1-line each (total 2-lines)
Pneumatic Valve Gate *Electric Circuit Only	2-lines	2-lines
Automatic Safety Door Open/ Close (Operation side)	-----	installed
Ejector Plate Return Confirma- tion (/Movable Side)	installed	installed

What makes JSW machines stand out are their repeatability and dependability. I'd recommend them to any company focused on quality parts that require strict adherence to dimensional specs.

– Mark C.

In 25 years of working together, JSW has always been able to support my needs for new equipment and dependable service.

– Craig B.

JSW machines are very easy to use. We never have any issues that require us to call for regular service, but when we do, we have a wonderful rep whom we know and trust.

– Bryan C.
